Abstract: With the increasing concern to develop environmentallyfriendly chemical processes, immobilization oftransition metal species for catalyst recovery andreuse has actively been investigated as a solution ofresidual metal problems in homogeneous catalysis. Moreover, palladium catalyzed organic transformations play a key role in the field of synthetic organic chemistry. Therefore, the design and the synthesis of new palladium based heterogeneous catalyst is of great importance. At the same time the new catalyst designed should be highly active, easily recoverable and recyclable and easily synthesizable. So in our work, we have selected highly active and green palladium based nanocatalyst which can be used for various new organic transformations like “C-C coupling” and “C-H activation”.

Biography

Education

- PhD: 2013 Chemistry, National TsingHua University, Hsinchu, Taiwan (R.O.C)
- M.Sc: 2006, Organic Chemistry, SavitribaiPhule Pune University, Pune, MH(India)
- B.Sc: 2004, Chemistry, SavitribaiPhule Pune University, Maharashtra, India

Professional Appointments

- **2017- prsent:** Assistant Professor(Ramanujan Fellow)Jain University, Bangalore, India
- **2016 - 2017:** PDF under Prof. Olivier Baudoin, University of Basel, **Switzerland**
- **2014 -2016:** PDF under Prof. Sukbok Chang, KAIST, South Korea
- **2013 - 2014:** PDF under Prof. Rai-Shung Liu, National TsingHua University, Taiwan
- **2006 –2009**: Research Associate, Glenmark Pharmaceutical Limited, Mumbai, India

Awards:

- **Early Carrier Research Award (2018)** awarded by DST-SERB, Govt. of India
- **Ramanujan Fellowship(2017)** awarded by DST-SERB, Govt. of India
- **Outstanding International Research Student Fellowship (2011)**, NTHU, Taiwan

Research Funding:

- Ramanujan research grant (2017-23), 38 lakhs, DST-SERB, Govt. of India
- ECRA research grant (2018-2021), 22 lakhs DST-SERB, Govt. of India

Research Area

- Catalysis and Organic Synthesis
- C-H activation
- Methodology development
